EDUCATION

Bachelor of Science in Information Technology
Father Saturnino Urios University, Butuan City

Aug 2022 – May 2026

TECHNICAL SKILLS

- Web & Mobile Development:** Laravel (PHP + React), React Native (Expo), HTML, CSS, Javascript
- Design & Collaboration:** Figma (Prototyping), Canva, Git, Github Actions (CI/CD)
- Databases & Security:** SQL (MySQL), NoSQL (Firebase), RBAC, JWT API Guards

EXPERIENCE

Strategic Communications & Auxiliary Resource Office
Frontend Developer Intern (OJT)

Jan 2026 - Present

Father Saturnino Urios University, Butuan City

- Contributing frontend expertise within a 4-member full-stack team to build the official FSUU website, sharing responsibilities to translate finalized designs into responsive web components.
- Streamlined the UI/UX workflow by converting legacy Canva layouts into interactive Figma prototypes, ensuring all visual elements strictly align with university branding guidelines.

Collaborative Full-Stack Developer | UrianWorks E-Commerce
(Academic Project - Team of 3)

Jan 2025 - Apr 2025

Father Saturnino Urios University, Butuan City

- Co-developed a student e-commerce platform using Laravel 12 and React 19, architecting the system to seamlessly handle distinct buyer and seller roles.
- Implemented a dual-authentication system with session-based and JWT API guards via Laravel Passport, alongside admin logic for real-time analytics and user moderation.

Literary Sports Coordinator
Computer Studies Program - Supreme Student Government

Aug 2023 - May 2024

Father Saturnino Urios University, Butuan City

- Managed literary and sports events for students, leading committees and coordinating student volunteers.

TECHNICAL PROJECTS

PALIHOG App (Startup Concept) | Capstone Project (Primary Developer)

Aug 2025 - Dec 2025

Father Saturnino Urios University, Butuan City

- Led the technical development of a campus task-management Minimum Viable Product (MVP), successfully building the mobile application using React Native to allow users to browse and accept tasks.
- Developed the web-based admin portal using Laravel and integrated a Firebase database to ensure real-time data synchronization across all platforms.
